# ABOUT US

EKJU is a Latvian company founded in 1992, dedicated to manufacturing practical and long-lasting outdoor wooden furniture of the highest quality.

Since 2021, EKJU, EKJU UK and AMATA belongs to a holding company AMATA, owned by the existing management team, that will now press ahead with further growth plans within the AMATA umbrella, using the same formula with the help of its valued existing employees.

We believe that wood of great quality creates a profound connection with nature. With Northern European wood, we keep our ancient Latvian woodworking traditions alive.

Since the very beginning, we have had high standards for our materials, only using wood with high density and quality. Every EKJU product is carefully produced with love for nature, detail and craftsmanship.

# EKJU QUALITY

We are Latvian craftspeople who work with attention to detail and the end-user in mind.

Our expertise lies in the extensive know-how we have accumulated over the years working with live wood. EKJU ensures that the final product is made from high-quality raw stock. We carefully select our suppliers and choose only the timber grown in the North because of its high density and durability.

Our simple step-by-step manuals make it easy for consumers to assemble our products.

We are a company with more than 27 years of experience and treat the products we create with pride and responsibility.

# EKJU TREATMENT

A high-quality treatment of wood guarantees our products' durability and longevity.

## WATER-BASED FLOW COAT PAINTING

Brighten up your garden by adding colour and creativity.

Our flow coat treatment is designed for decorative finishes.

## ECO TREATMENT

Our eco-friendly linseed oil painted and stained product selection shows our commitment to sustainability with its water repellent and UV protective properties. A surface coated with eco paint or stain is easily renewable, we recommend reapplication every 2-3 years.

### LINSEED OIL PAINT

This paint is eco-friendly and made with boiled linseed oil, adding to it highest-quality natural mineral pigments and binders. It completely covers the wood structure, increases its wear resistance, water resistance and protects it from environmental impact. Unlike chemical paints, it has no unpleasant odour do. The paint does not peel or crack. It extends the abrasion resistance of the wood. Natural mineral pigments provide protection from harmful UV (ultraviolet) rays. A surface coated with this paint is easily renewable.

### LINSEED OIL STAIN

Stain is highly pigmented boiled linseed oil that highlights the structure of wood. Boiled linseed oil is the main ingredient of the stain. Finely ground pigments provide an even coating and protect the surface against UV rays. The stain provides long term protection from moisture. It does not peel or crack. The surface is easily renewable.

## PRESSURE TREATMENT

Pressure treatment is an effective way to increase product durability with protection fungus, decay and weathering. We use a preservative system based on the well-established effectiveness of copper combined with an organic quaternary compound that is applied to timber under pressure.

Pressure-treated timber boasts lasting protection against fungi, insects such as woodworm, and the elements. We take responsibility for our manufactured goods in case of rot.

EKJU products will serve you for a long time. It is highly recommended to restore the wooden surface regularly (once every 4-5 years) using a suitable product.

\*Our furniture is long-lasting provided that the product is not mechanically damaged or subjected to extreme conditions, such as the inappropriate use of chemicals, excessive humidity, heat, etc.

01	Green impregnation	L0	Dyed linseed oil stain – grey	15	Painted with high quality TEKNOS paint – Black
02	Brown impregnation	D0	Paint dip - Grey		
06	Grey impregnation	D1	Paint dip - Orange		

GREY and ORANGE DIPPING

Our high quality grey and orange dipping impregnation will add more color to garden.

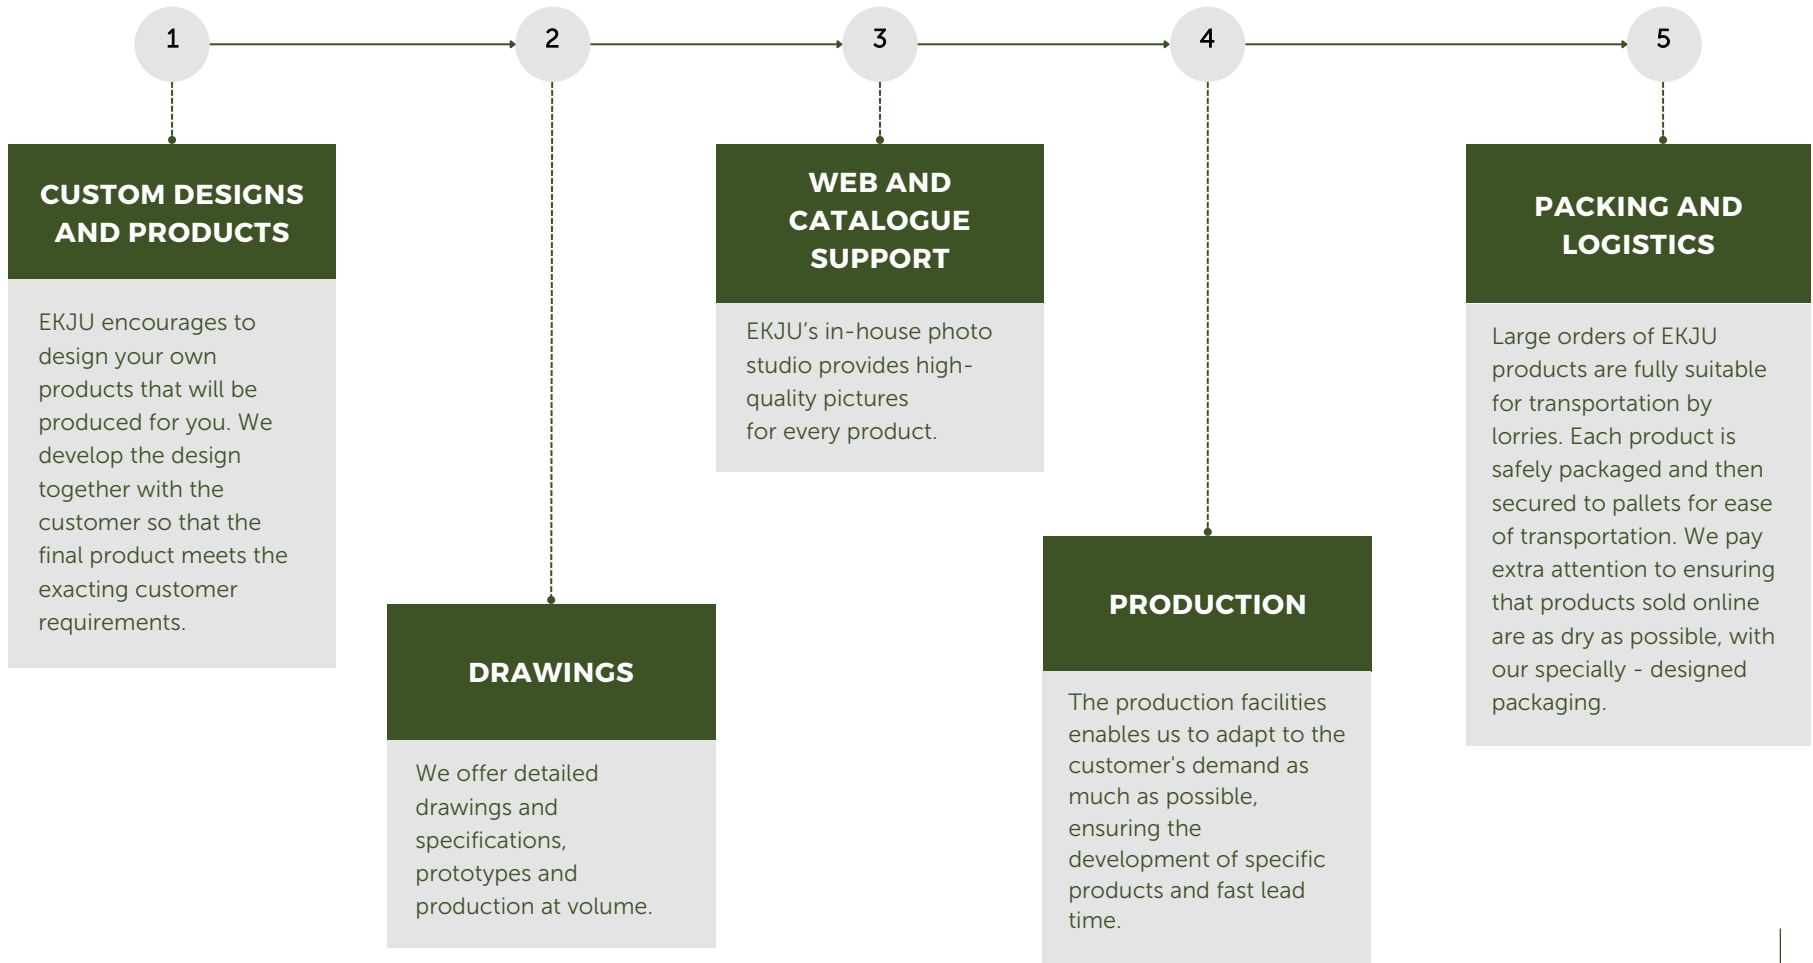

## WEB AND CATALOGUE SUPPORT

# V\_FRO Collection

The series "V-Fro" provides a combination of excellent design and solid craftsmanship suited for outdoor use. From a resting place under the apple tree during the day, table and bench set transforms into a gathering spot in the evening by a campfire.

Good design and high-quality materials result in furniture that will contribute to the well-being of the owner in the long term. The minimal use of materials underlines the clear design vocabulary of the objects. A slight shift of the axes is enough to make the furniture something special: the V-shape of the legs brings stability, the seat tilts at the same angle and gives a comfortable seating experience.

## Matthias Froböse

designs straightforward and clear design objects.

It is the simple shapes and clean lines that are at the centre of his design, not whimsical fashion objects that can be subjected to the changeability of contemporary taste.

Various aspects of his work deal with visual and haptic perception. His passion lies in designing for the series, discovering new forms and proportions, feeling and creating new ones.

He lives and works in Berlin and Rostock, has a deep passion for gardens and horticulture, loves to observe and enjoy the garden from different places.

# EKJU CLASSIC

Our furniture is manufactured according to the latest technological processes while keeping it functional.

Designs are modern and widely used.

## Tables and sets

The early evening sun is stretching across your garden, inviting the tree branches to dance in the warm summer breeze. It is neither too cold nor too hot. Just right to enjoy the weather. Our table sets bring exactly the harmony you seek when enjoying a dinner for two, or quality time with family.

## Benches and chairs

After a hard day's work it always feels great to stretch out and just take it all in. Look back on the accomplished tasks of that day with a calm heart, or share a private conversation with your significant other.

# FOR KIDS

Having EKJU furniture around can really liven up the yard, making it so much more fun for the kids to play outside. The picnic table is super convenient for eating and doing crafts and other projects outside. The sandbox is a great way for kids to be creative and once they're done, you can just cover it up.

For a safety play, the furniture has been tested and conforms to European Standard.

# HANGING SHELVES

Create a livelier look for your wall and garden.  
Bring the peace of nature with you to the city.  
Imagine inviting a friend over for a  
home-cooked meal. If they ask for extra basil  
for the pizza you just cooked, you turn around  
and take some from the shelf on the wall next  
to you.

# PLEASANT GARDENING

Our garden series is designed to cultivate urban gardening and ideas for how to grow your own herbs or traditional medicines in the city.

No garden is complete without lush beds for the roots and pots, chicks and chickens, and hardy enough for kids who might be too curious for their own good or running around your garden.

We craft our  
furniture with  
respect for nature.

By supporting responsible wood sourcing  
and forest management, we keep our  
promise of being environmentally friendly.  
Look for our FSC®-certified products.

This is why we are certified by the  
Forest Stewardship Council® (FSC®).  
Certification number: BV-COC-002739.

# FORESTATION

Forest regrowth takes a long period of time, regardless of whether it is restored in the natural way or with human assistance. Every year, EKJU employees and with their family members plant new forests, contributing to the forest regeneration process.

Properly managed forests can provide wood for centuries, which is why "EKJU" LTD asks everyone to be responsible and respectful towards the green jewel of the world – the forests.

All materials used during the manufacturing process – raw materials, all components of the finished products, even the packaging – are intended to be recycled.

Wood can be used for energy production; polyethylene, paper and metal parts are recycled.

*The old Latvian proverb says, "One who gives to the poor shall not lack".*

It contains a deep philosophical meaning which our company believes in – to give back to nature what we take from it. It is important for us to maintain harmony with nature and future generations.

# MAINTENANCE

The natural materials the furniture is made from are specially treated to withstand environmental damage.

However, over time the treated wood begins to lose its original colour. Despite the colour change, its sturdiness stays the same, as the impregnating agent continues to protect the wood.

To restore or paint our garden furniture, simply ask for advice at a local DIY store. They will suggest the most suitable treatment to use.

*\*Staying abreast of the ongoing development of the woodworking industry, "Ekju" LTD reserves the right to, without prior consent, modify the appearance and technical specifications of the product.*

# FACTS ABOUT WOOD

We create outdoor furniture with respect for the unique details in every piece of wood, which gives which gives your furniture its personality.

*Wood can affect the material tolerance due to its natural properties and characteristics. Therefore, our wooden products have +/- 2mm tolerance.*

# REAL SOLID WOOD IS ALIVE

Wood branches

Wood cracks

Wood resin

Uneven texture and  
colour of wood

Twisting & bending

Wood fiber

Impregnation fluid

Don't forget to tighten up  
all screws and bolts time  
to time

These natural, live wood characteristics are proof, that our products are made from real solid wood, grown in harsh Nordic forests and now, bringing you pleasure and joy.

# Logistics

Large orders of EKJU products are fully suitable for transportation by lorries. Each product is safely packaged and then secured to pallets for ease of transportation.

EKJU has also developed an online packaging system suitable for our impregnated garden products. We pay extra attention to ensuring that products sold online are as dry as possible, with our specially-designed packaging.

Quality since 1992
